

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

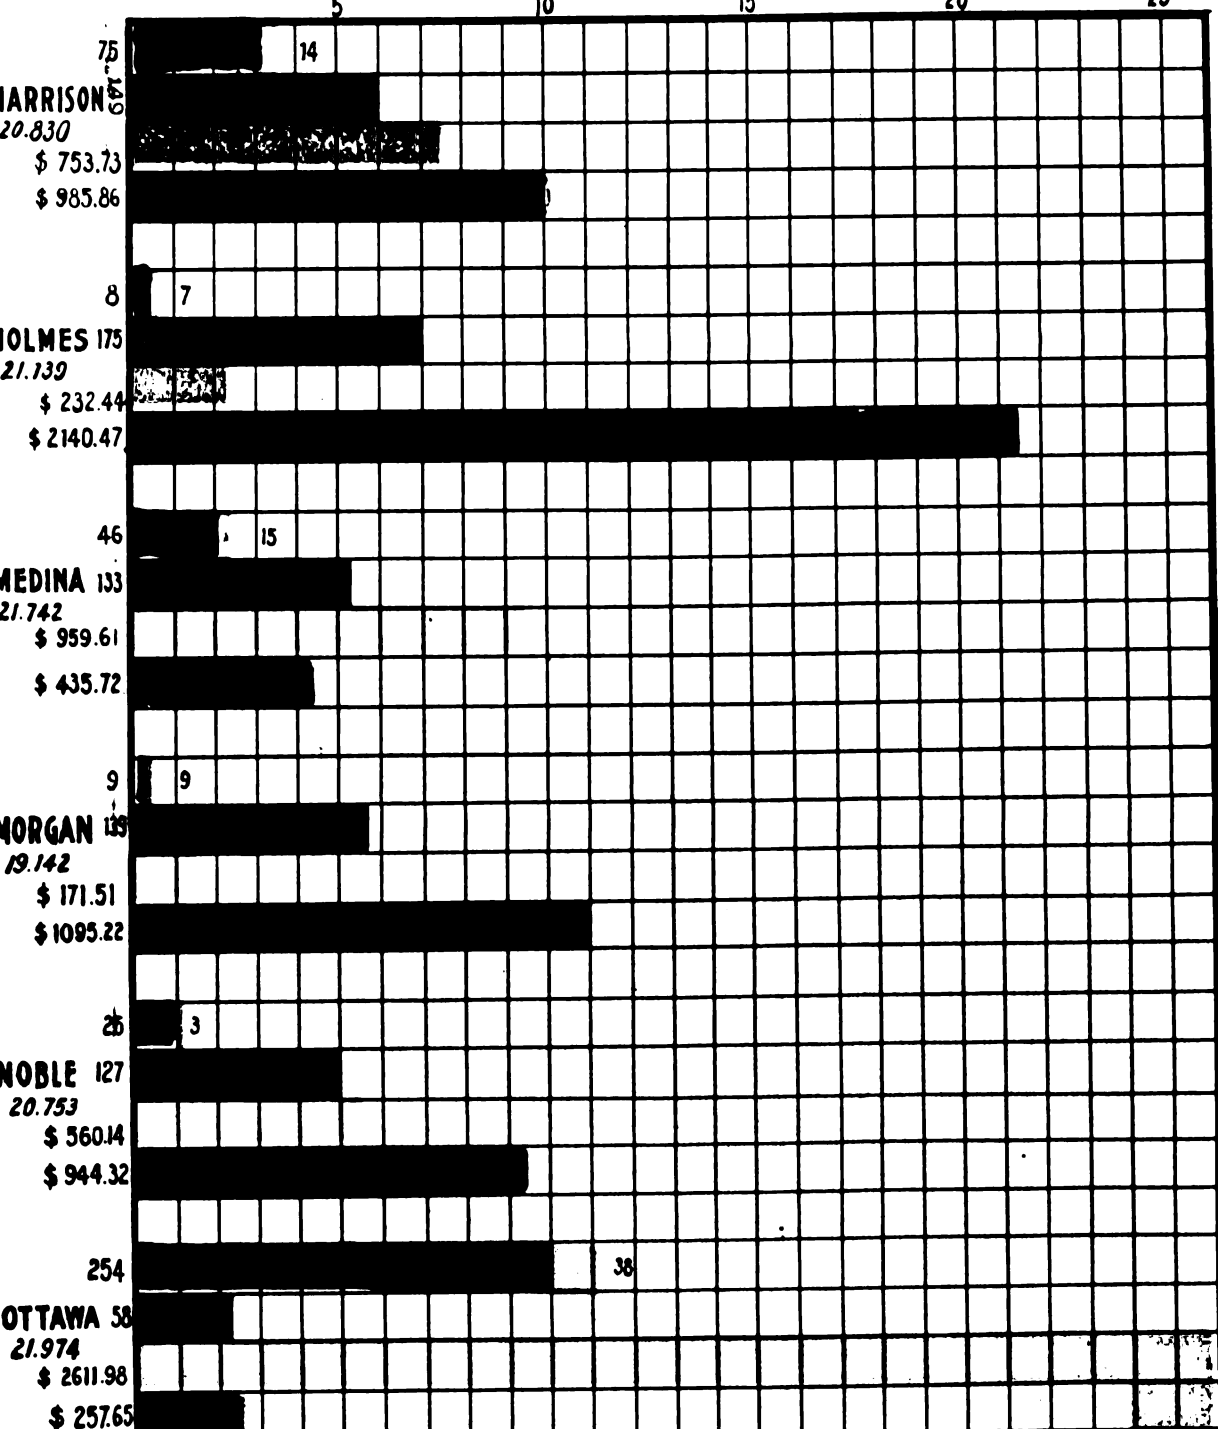

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Annual Report of the Board of State Charities to the Governor of ...

Ohio Board of State Charities

Twenty-Fifth Annual Report

OF THE

OHIO BOARD

OF

STATE CHARITIES

FOR THE

Fiscal Year Ending November 15, 1900.

COLUMBUS, OHIO:
FRED. J. HEER, STATE PRINTER.
1900.

DEPOSITED BY HARVARD COLLEGE LIBRARY

MEMBERS OF THE BOARD.

(Term of Office, three Years.)

LAW UNDER WHICH THE BOARD OF STATE CHARITIES OPERATES.

(O. L., Vol. 93, pp. 105-106.)

(As amended April 12, 1898.)

SECTION 655. The governor shall appoint six persons, not more than three of whom shall be from the same political party, who shall constitute a board of state charities, to serve without compensation; two of whom, as indicated by the governor, upon the fixed appointment, shall serve for one year, two for two years and two for three years; and upon the expiration of the term of each, his place, and that of his successor, shall, in like manner be filled, for the term of three years. The governor shall be ex officio a member of said board and the president thereof. Appointments to fill vacancies caused by death, resignation or removal before the expiration of such terms may be made for the residue of terms in the same manner as original appointments.

Sec. 656. That the board of state charities shall be provided with a suitable room in the state house. Regular meetings of the board shall be held quarterly, or oftener if required. They may make such rules and orders for the regulation of their own proceedings as they may deem necessary. They shall investigate the whole system of public charities and correctional institutions of the state, examine into the condition and management thereof, especially of municipal and state prisons and reformatories, workhouses, jails, infirmaries, children's homes and state institutions; and the officers in charge of all such institutions, and those who are in any way responsible for the administration of public funds used for the relief or maintenance of the poor, shall furnish to the board, or its secretary, such information and statistics as they may require; and, to secure accuracy, uniformity and completeness in such statistics, the board may prescribe such forms of report and registration as they may deem necessary. And all plans for new jails, workhouses, children's homes, infirmaries, state institutions, and municipal lockups or prisons, and for important additions to, or alterations in such existing institutions, shall, before their adoption by the proper officials, be submitted to the board for criticism and approval. The governor, in his discretion, may, at any time, order an investigation by the board, or by a committee of its members, of the management of any penal, reformatory or charitable institution of the state, and said board or committee, in making any such investigation, shall have power to send for persons and papers, and to administer oaths and affirmations; and the report of such investigation, with the testimony, shall be made to the governor, and shall be submitted by him, with his suggestions, to the general assembly.

Sec. 657. That the said board may appoint a secretary, who shall receive for his services, in addition to his traveling expenses, such salary as may be agreed upon by the board, not to exceed twelve hundred dollars per annum. All accounts and expenditures shall be certified as may be provided by the board, and shall be paid by the treasurer upon an order from the auditor of state.

Sec. 658. The board of state charities shall annually prepare and print, for the use of the legislature, a full and complete report of all their doings during the preceding year, stating fully and in detail all expenses incurred, all officers and agents employed; with a report of the secretary, embracing all the respective proceedings and expenses during the year, and showing the actual condition of all the state institutions under their control, with such suggestions as they may deem necessary and pertinent.

Sec. 5. This act shall take effect upon its passage.

2470.1
Twenty-Fifth Annual Report

AUG 28 1901
OF THE

Ohio Board of State Charities.

OFFICE OF THE BOARD OF STATE CHARITIES.

NOVEMBER 15, 1900.

To the Seventy-Fifth General Assembly of the State of Ohio:

This, the Twenty-Fifth Annual Report of the Board of State Charities, completes twenty-five years of service, covering the last quarter of the nineteenth century.

It is not improper to review very briefly the principal reforms instituted during that time, and to enumerate those things still left undone, and which must sooner or later be accomplished.

The Board of State Charities was first established in Ohio in the year 1867. For several years no appropriation of any kind was made by the Legislature for its support. The actual expenses of the Board during those years were met from the contingent fund of the Governor. The services of the Secretary were given gratuitously.

This first Board (1867-1872) laid the foundation for most of the subsequent work. It contemplated, among other things:

First. A prison system that should make every provision for the criminal classes, beginning with the first offense of children, and on through to the confirmed and habitual criminal. This scheme, as outlined in 1869, included reformatories for juveniles; a graded prison for young men convicted of the first offense; the Ohio Penitentiary; the Indeterminate Sentence; the Parol Law; the Habitual Criminal Law; an Advisory Board of Pardons; district workhouses for misdemeanants; jails of approved construction, wherein prisoners should be separately confined. All of these have been accomplished.

Second. The removal of children from county infirmaries. This has been done.

Third. A separate institution for epileptics. This has been provided.

Fourth. Custodial care of adult idiots by the State. This has been inaugurated.

Fifth. Some sort of assistance for discharged convicts. Nothing has been done.

Sixth. The removal of our benevolent, educational and penal and reformatory institutions from partisan political influences. There has been but very little change for the better in this regard.

In 1872 the Board was abolished.

In 1876 it was again established and has continued in existence up to the present time.

The lines of work laid down by the first Board were followed very closely by the second, and most of the recommendations and suggestions made during the years 1867 to 1872 were actively advocated and brought to fulfilment in the subsequent years. The principal reforms have already been indicated, but these alone have not engaged the attention of the Board.

Boards of County Visitors have been organized in each county of the State.

The State Conference of Charities and Correction was organized, as was also the State Conference Board of Ohio Hospitals. This latter Board has made it possible to present, periodically, comparative statistics of our hospitals, and these comparisons, with the discussions that have followed, have been of very great value.

The codification of the poor laws in 1898. By this codification the laws have been simplified and rendered more efficient, and a large annual saving in expenditure has resulted.

Much legislation affecting the administration of state, county and municipal institutions, and we believe, for the better, has been prepared by the Board and enacted into law.

It remains to enumerate our present needs and shortcomings:

First. We enter the new century with three hundred epileptics, seven hundred idiots and thirteen hundred insane in our county infirmaries. All three classes should be under the State's direct care and supervision. Under our present law the insane and epileptics must be taken from the infirmaries by June 1, 1903. The idiots should be provided for at the State's Custodial Farm.

Second. Our children's homes are maintaining a daily average number of children of approximately twenty-four hundred. With proper placing-out facilities this number should be reduced, within a few years, to less than one-half that number.

Third. We have absolutely no provision for crippled children. Some arrangement should be made, by public or private means, whereby children of this character may be given such education as will best fit them for self-support.

Fourth. We require separate provision for the criminal insane.

Fifth. We should have a separate prison for women.

Sixth. Separate buildings for our insane hospitals should be erected; where not already so provided, to be used as detention and observation wards, and for the chronic insane.

Seventh. We should have a law providing for probation officers and suspended sentences.

Eighth. The State, by some agency, should carefully look after children sent out from the Boys' Industrial School and the Girls' Industrial Home.

Ninth. The Board of State Charities should be given the support necessary to enable it to enforce the proper keeping of records by infirm-ary officials, township trustees in their work of caring for outside poor, sheriffs, and children's home officials.

Tenth. Some of our laws, notably those providing for the separation of prisoners in county jails, and the Cumulative Sentence law, are not enforced.

Eleventh. The old cell blocks at the Ohio Penitentiary should be reconstructed. The cells in this block are an abomination. They are not fit for use. They are too small and without light or ventilation.

Twelfth. Increased provision should be made at the Institution for the Blind for school purposes.

Thirteenth. Our institutions, state, county and municipal, must be administered with more regard for the welfare of their inmates and the interests of the people who support them, and less for partisan political purposes.

At no time in its history has the Board been vested with direct authority, save in the matter of official investigations ordered by the Governor. The reforms which have been hastened by its work and influence, have been effected through the intelligent co-operation of our legislators and the citizens of the State. The need of reforms in our laws, and in the administration of our institutions, has been patiently and perseveringly pressed upon our people, together with the reasons therefor. The result of all this has been that when changes were made the citizens of the State have very generally given their hearty support and co-operation to the new order of things. It has been the constant aim to educate the public mind, and to enforce reforms only when the people of the State have themselves seen the reasons therefor. While the interest of the people in matters pertaining to the dependent and defective classes is not always manifest, and while this lack of interest encourages the belief that the public generally has very little concern for such matters, still we believe that in our own State the progress we have made is very largely due to the continued efforts of this Board and its agencies in educating the public mind; and we believe that in all matters connected with the care and treatment of the poor and defective, we have had, in Ohio, as in few other States, the intelligent assistance of the people.

INSANE.

By act of the General Assembly (O. L., Vol. 93, p. 274), passed April 26, 1898, it was provided that on and after the first day of June, 1900, it should be unlawful to receive or keep in custody in any county infirmary in the State of Ohio, any insane or epileptic persons, but unfortunately, with the appropriations granted, it was impossible to make the necessary provisions for all infirmary patients, and consequently by act of the General Assembly passed April 14, 1900, (O. L., Vol. 94, p. 166) the time was extended to June 1, 1903.

The number of insane remaining in county infirmaries on the 31st of August, 1900, was 1,277, and of epileptics, 304, making a total of 1,581 to be provided for.

Upon the completion of the Massillon Hospital as planned, additional accommodations for about 800 patients will be provided, which will leave about 800 insane and epileptics to be cared for by additional cottages at the other state hospitals. For infirmary patients, cottages, costing not more than \$300.00 per capita, would be required, and the necessary appropriations therefor will doubtless be made if properly presented to the General Assembly.

It will be noticed that at Athens and Dayton the number of patients provided for are from 200 to 400 less than at the other hospitals for the insane, so that in erecting additional cottages for infirmary patients it would seem desirable to locate them at those two points so as to even up with the others.

DISTRICT HOSPITALS.

There are in the State several counties which have, in connection with their infirmaries, separate buildings with well equipped provision for the insane, which, if placed under the administration of the state hospitals of the district in which they are located, might be utilized, temporarily, for the care of chronic cases.

ACUTE CASES.

In the development of our system of State care for the insane, by aggregating in large colonies, there now seems to be a pressing need, at each of our hospitals, for the erection of buildings for acute, or curable cases, in which all modern appliances for their treatment shall be supplied.

Such buildings are already provided at Massillon and Toledo and another at Longview is approaching completion. If similar provisions were made at Athens, Cleveland, Columbus and Dayton, the transfer to them of acute cases would make room for a corresponding number of infirmary patients, so that a less number of cottages for this class would be required for present needs.

CRIMINAL INSANE.

There is now a general consensus among alienists that the criminal insane should be separated from all others, and cared for in an institution by themselves. The Board of State Charities has recommended, for many years, that this should be done in Ohio, as it is in Illinois, Massachusetts, New York and Michigan.

On the Columbus State Hospital grounds, northwest of the existing buildings, there is ample room for such an institution, and its erection is greatly to be desired.

OHIO PENITENTIARY.

During the last year the Ohio Penitentiary has had the excitement of an extensive change of officers. The new officers seem to have secured control of matters and to be investigating and providing for and carrying out desirable improvements. The officers report that now no prisoner is constantly kept in an iron cage, and that corporal punishments are growing less severe and less frequent.

On November 1st, 1899, the number of prisoners was 1,909; and on November 1st, 1900, the number of prisoners was 1,744. The number received from November 1st, 1899, to November 1st, 1900, was 880, as follows:

| | |
|---------------------------|-----|
| On first conviction..... | 688 |
| On second conviction..... | 135 |
| On third conviction..... | 36 |
| On fourth conviction..... | 18 |
| On fifth conviction..... | 3 |
| Making in all..... | 880 |

The number discharged from November 1, 1899, to November 1, 1900, including all pardons and deaths, was 1,045; making a total decrease of 165.

The total expenditure for the year ending November 1, 1900, was \$307,743.43. The total earnings for the year ending November 1st, 1900, were \$248,510.53. And notwithstanding the extra expense on buildings the total expenses exceed the total receipts only \$59,232.89.

The average population was 1,878; and the average per capita expense was \$163.87. There are no idle prisoners; all able bodied prisoners have work. This is a record of which the Ohio management may well be proud; especially when compared with that of the State of New York, where in their recent State Conference of Charities and Correction the New York "Outlook" states it to have been reported that "in one of the largest State prisons the men average but an hour a day at work, while in the State Hospital for insane eighty per cent. are happily and usefully employed. The convicts may well envy the harmless lunatic this boon of busy hands."

We sadly recall that five years ago in our Ohio Penitentiary there were confined in the *idle* house, without work, and without reading or any employment or amusement, more than *one thousand* able bodied prisoners.

The health of the prisoners is reported to be "exceptionally good."

There have been paroled since November 1st, 1890, 720 prisoners, and during the year ending November 1st, 1900, 57, and since May 1st, 1900, 20; and during the last fiscal year three paroled men have been returned to the penitentiary. The officers seem to be cautious and wise in the parole of prisoners; and they do not regard any prisoner worthy of parole "unless the record and character of the prisoner established in prison," as required and shown to the daily watchful care of the keepers, present "reasonable ground to believe that he will, if released, live and remain at liberty without violating the law, and that his release is not incompatible with the welfare of society." Mere non-violation of the rules is not sufficient; this is required of every prisoner; there must be not only a good *record* but a change to *good character*—"in the *judgment* of the Managers," the statute demands—before he has earned and may receive his parole. They understand that the parole law may be and has been greatly misapplied, and that paroles have been "incompatible with the welfare of society."

They do not wish that the parole law of Ohio, as in some states, shall induce bad men and criminals to come to her garnered property and quiet homes for criminal plunder and ruin; nor that her paroled men shall, while on parole, return to a criminal life. For such officers there is needed an honest heart and intelligent purpose in this work, and an irreproachable character and superior qualifications for such noble and moral instruction and guidance to good citizenship.

Honest and just dealing by officers with prisoners can alone secure success and insure good government. In France and other parts of Europe many prison officers claim, and they boast of the fact that they have absolute isolation of individuals from the time of the arrest of the accused to the discharge of the convict prisoner; but this claim is mostly a mere pretense except its dire results. There is no such lock-up, police station, jail or prison *known*; and a little investigation has soon exposed the false claim, as has been done in Paris, in Brussels and in other places. They may and should keep the innocent and the novice from association with the experienced and habitual criminal; but when the prisoner is taught to help in the deception and hypocrisy, and takes part in such deception, honest and true reform is stopped, and the prisoner grows worse, and cannot longer believe in or practice honest dealing.

Our prison congregate system does not admit of cellular seclusion, and the question is sometimes asked, does not general and constant visitation of a large number of visitors tend to harden the prisoners, and

also interfere with good discipline? For the last two years the money received from fees paid by visitors for visits, has been as follows: For the year 1899, \$6,460.54; for the year 1900, \$7,728.38. Yet the officers say they "think that the policy is all right."

There is a growing demand from officials and from philanthropists interested in the reformation of criminals, that something shall be done to aid discharged prisoners. Generally the man about to be discharged from prison resolves to go forth to his fellow men a changed and true citizen; but his best and truest friends may not be able, and may not have the heart, to meet him as he goes from the prison doors, and then shield him and take him through temptations to a virtuous and true home beyond the solicitations of false and evil former comrades. For his present and future manhood and good citizenship, *then* he needs a friend. Up to this time the State has done little or nothing to aid the feeble resolutions of the prisoner leaving the prison; although eighteen years ago the Bench and the Bar of the Ohio State Bar Association approved the principles of such aid and the establishment in Ohio of an agency to furnish such aid and assistance to our discharged prisoners. After that the matter was presented to the public of Columbus, and then and since that time the public have seen that even in matter of economy the State or the city of Columbus could well afford to support such an agency. At different times since the prison officials, this Board and others seeking the lessening of crime, have called attention to this subject, and to the establishment of agencies and societies for such aid, and requested immediate and favorable action; and now again we call such attention with hope, and we think we see signs of success.

This Board and the Women of Ohio ask that a special prison be provided for the women prisoners of the penitentiary. And we hope to secure the co-operative influence and aid of the "Federation of Woman's Clubs" of Ohio, and the influence and aid of other noble women of the State, in making needed proper legislation for a *model* penitentiary for women. If the women of Ohio speak with their united voice a suitable building and the proper officers will be provided.

The schools for the education of the prisoners seem to be doing well with the present means and rooms, but their efficiency and value might be much greater were there more and better rooms and appliances.

OUTSIDE RELIEF.

The changes in the poor laws made three years ago have rendered the collection of accurate statistics on outside relief difficult, requiring, as they did, a radical change in the administration of poor relief funds. The office of the Board of State Charities has endeavored, as far as possible, to secure some uniformity in the keeping of records, with a large measure of success; but the reports received from both counties and townships are as yet far from satisfactory. A number of counties

are operating without reference to the provisions of the new laws. Where the county and township officials have conformed their operations to the new order of things a very large saving in outside relief expenses has been made, averaging probably forty per cent.

Prior to 1897 the counties reported an aggregate yearly expenditure for outdoor relief of between five hundred and six hundred thousand dollars. For the year ending June 30th, seventy-nine out of the eighty-eight counties reported a total expenditure of \$153,995.79. Of this amount, \$45,070.74, or nearly thirty per cent. of the total expenditure, was paid to physicians. The total number of people receiving relief from the counties (68 counties reporting) was 13,200. The number of persons aided shows a decrease over 1897 corresponding with the decrease in expenditure; 1,864 persons were receiving relief from counties in which they were not at the present time residing, the amount paid for their support being \$25,475.06. These figures added to those already given make a total number of persons receiving outdoor relief from the counties, of 15,064, and a total cost of \$179,401.83.

The figures so far given represent only the relief administered by county officials. Our present system of poor laws contemplates the giving of outside relief largely through the individual townships and cities. It is presumed that the relief given by county officials shall be given for such cases as cannot with propriety be taken into the county infirmaries. The amount of county relief should be small in comparison with the amount expended by townships. There is not as marked a difference as there should be. There are several reasons. Chief among them are (1) the disregard of the provisions of the poor laws by many of the county officials, in that they continue to administer outside relief under the laws repealed three years ago; (2) the inability of a large number of county and township officials to make any intelligible or accurate statement as to the amount of relief given by them; in many instances the records are kept, if at all, with a very marked degree of incompetency; (3) a duplication of reports by township and infirmary officials.

The statistics of township outdoor relief have been collected with great difficulty. There is a marked improvement in the character of the reports made, as compared with 1898 and previous years, but the number of townships failing, for one reason or another, to make any report, is altogether too large.

Seven hundred and eighty-three townships, including all of the large cities of the State, reported for the year ending June 30, 1900. Their reports show 48,533 persons as having been relieved, including children. Nearly one-fourth of this number is reported from Hamilton county. Cuyahoga County reported 7,330. The total expenditures were \$193,505.40. Of this amount Hamilton County reported \$21,835.77, and Cuyahoga County, \$30,964.21. There is a marked difference between Cuy-

ahoga and Hamilton Counties in their relative amounts expended and number of persons helped. The per capita relief to recipients in Cuyahoga County was \$4.28, and in Hamilton County, \$1.68. Of the total expenditures by townships (\$193,505.40), about twenty-six per cent., or \$50,019.02, was paid to physicians. Additional items are as follows: Food, \$70,493.45; clothing, \$25,046.22; fuel, \$14,856.76; funeral expenses, \$13,247.10; transportation, \$8,203.43.

While in many ways the statistics on outside relief are unsatisfactory and incomplete, yet there is an evident improvement in the care with which funds are administered and records kept. The splendid results in counties where the laws are administered in spirit and in letter, and the large decrease in expenditures in such counties, fully warrant the claim made by the Board of State Charities previous to the adoption of the new poor laws three years ago, that the changes then made would result in an annual saving of between \$200,000.00 and \$300,000.00.

STATISTICS.

The usual statistical exhibits accompany this report. The importance and value of these statistics and the immense amount of labor required for their collection and tabulation would seem to make it desirable that every possible means should be used to render them accurate and complete. So far as the present office facilities will permit no effort has been spared to secure reports and to verify their accuracy. But in spite of all that has so far been attempted a large number of township clerks and a limited number of county officials either ignore official requests for reports, or are unable, on account of badly kept records, to make any intelligible return.

The work of the several classes of institutions, and of the townships in caring for the poor can be judged only through comparison with each other. There is no other department of the State where the statistics which must serve as the basis for these comparisons are collected, and hence it becomes all the more important that those collected in this department should be reliable. We believe that this department of work is of sufficient importance to justify a request here made that the Board be given whatever additional support and assistance may be necessary to secure the best possible results. In this connection we wish to call especial attention to a system of colored charts, prepared by our Secretary, wherein comparisons are instituted between certain counties and townships in the state in outside relief expenditures. These charts show, in a very striking manner, the benefit to be derived from the statistics collected from year to year in the office of the Board.

OHIO STATE CONFERENCE OF CHARITIES AND CORRECTION.

The Tenth Annual Ohio State Conference of Charities and Correction was held in Dayton in October. The proceedings of this conference will appear in the Quarterly Bulletin.

A RESUME OF STATISTICS FOR 1900.

State Institutions.

The whole number of inmates of the seventeen institutions, exclusive of the Institution for the Blind, during the year 1900, was 20,773. Of this number 15,533 were on hand at the beginning of the year. Five thousand two hundred and forty were admitted during the year. The number discharged was 3,888; died, 835 — a death rate of 4 per cent. The number remaining at the close of the year was 15,799.

The total amount expended during the year for current expenses was \$2,241,404.34; for salaries and expenses of officers and trustees, \$383,470.94, making a total of \$2,624,875.28. To this should be added the amount expended for repairs and improvements, etc., \$320,984.29. In this latter sum are not included expenses for new buildings save in the instance of the State Hospital at Toledo.

In the disbursements for current expenses the following items are included: Amusements, \$5,924.04; boots and shoes, \$22,361.67; butter and eggs, \$152,834.43; bread stuffs, \$211,438.41; blank books and stationery, \$10,100.96; chapel services, \$1,640.80; canned goods, \$24,429.70; clothing and furnishing, \$127,576.72; drugs and medicines, \$26,102.19; dry goods and notions, \$75,321.02; dried fruits, \$23,716.17; fuel and light, \$189,427.99; fish and oysters, \$20,055.66; fresh fruits and berries, \$22,653.90; groceries, \$156,304.57; milk, \$58,454.29; meats and lard, \$256,904.13; poultry and game, \$18,015.81; tobacco, \$11,799.88; (all of this latter item, with the exception of about \$650.00, was expended in the state hospitals) telephone and telegraphing, \$5,647.55; vegetables, not including garden products of the several institutions, \$54,588.72; wines and liquors, \$4,563.82; wages, \$576,673.79.

The daily average number of inmates maintained in the several institutions, and the yearly per capita cost of their maintenance, excluding expenditures for ordinary repairs and permanent improvements is as follows:

| | | |
|--|-------|----------|
| Athens State Hospital..... | 951 | \$129 89 |
| Cleveland State Hospital..... | 1,094 | 165 56 |
| Columbus State Hospital..... | 1,370 | 158 37 |
| Dayton State Hospital..... | 820 | 162 39 |
| Longview State Hospital..... | 1,104 | 144 52 |
| Massillon State Hospital..... | 590 | 180 53 |
| Toledo State Hospital..... | 1,438 | 152 53 |
| Hospital for Epileptics..... | 923 | 177 07 |
| Institution for Feeble-minded Youth..... | 1,061 | 167 75 |
| Institution for Deaf and Dumb..... | 488 | 221 57 |

The combined daily average in the institutions was 15,561.

STATISTICS OF OHIO STATE HOSPITALS.

These statistics include the seven hospitals for insane located at Athens, Cleveland, Columbus, Dayton, Cincinnati, Massillon and Toledo, and the Hospital for Epileptics at Gallipolis.

These institutions, since their establishment, have cared for a total number of inmates of 52,575 — men, 27,479; women, 25,096. The total number of recoveries reported was 18,075, or 34 per cent. of the whole number under treatment; 7,201 were discharged as improved. The total number of deaths was 10,303. The apparent large death rate of nearly 20 per cent. is explained in the fact that our hospitals are becoming the last earthly home of a majority of the persons committed to their care. Probably 70 per cent. of the persons committed to these institutions become, if they are not already so at the time of their admission, chronic cases, and are maintained by the state until death.

The whole number cared for during the year 1900 in these eight institutions was 11,032. Of this number 8,218 were on hand at the beginning of the year, and 2,814 were newly committed. The inmates of the Epileptic Hospital are included in these figures. (This institution cared for 1,164 inmates during the year). Last year the number discharged as recovered was 726, including 26 from the Gallipolis Hospital; discharged improved, 408, including 66 from Gallipolis. The number of deaths was 655. The whole number remaining at the close of the year was 8,536, a gain in the population during the year of 318. The daily average number during the year actually in the hospitals was 8,290.

The combined net current expenses for the year, including salaries, were \$1,180,366.69. The total number of employees, exclusive of officers, was 1,152.

STATISTICS OF STATE BENEVOLENT AND EDUCATIONAL INSTITUTIONS.

The statistics of the benevolent and educational institutions in which are included institutions for the Deaf and Dumb, the Blind, Feeble-Minded Youth, Ohio Soldiers' and Sailors' Orphans' Home, and the Ohio Soldiers' and Sailors' Home, show a total number of inmates maintained in them since their establishment, of 18,399. The number on hand at the beginning of last year was 4,318; received during the year, 803, making a total for the year of 5,121. The number remaining at the close of the year was 4,201, a decrease in population of 117. This decrease occurred at the O. S. and S. Home, there being 1,329 inmates in that institution at the close of the year, as against 1,599 at the beginning of the year.

The total number of officers, teachers and employes in these institutions is 754.

The net current expenses of last year, including salaries, was \$655,426.18.

STATISTICS OF PENAL AND REFORMATORY INSTITUTIONS.

The statistics of penal and reformatory institutions include the Ohio Penitentiary, Ohio State Reformatory, Boys' Industrial School, Girls' Industrial Home, Cincinnati House of Refuge, and the Workhouses located at Canton, Cincinnati, Cleveland, Columbus, Dayton, Toledo, Xenia and Zanesville.

The whole number of inmates committed to these institutions since their organization is 263,759. There were remaining in them at the beginning of last year 4,802; number of inmates received during the year was 12,551, making the total for 1900 of 17,353. The whole number of deaths during the year was but 57. The number remaining at the close of the year was 4,946, a gain of 144.

The total number of officers, guards, teachers and employes was 509. The total current expenses and salaries was \$761,639.94. The value of earnings was \$361,859.70.

INFIRMARY STATISTICS.

The eighty-five institutions reporting (including the Cincinnati City Infirmary), show a total number of inmates for the year of 12,645, of whom 8,087 were men. The number remaining in the infirmaries on September 1, 1900, was 7,532; on September 1, 1899, the number was 7,703, a decrease in 1900 of 171. The number of children born in the infirmaries during the year was 125. During the year 155 men and 128 women were transferred from the infirmaries to state institutions. Nearly all of these were insane or epileptic. Forty-two boys and thirty-two girls were placed out in families. The number of deaths was 1,036—700 men and 336 women.

The reports show that a little over forty per cent. of the inmates remaining at the end of the year were unable to read or write.

Of those remaining in the infirmaries September 1, 1900, 153 were under three years of age, 150 were between the ages of one and sixteen years, 3,493 between the ages of sixteen and sixty, and 3,356 over sixty.

A number of counties report the presence of children in the infirmaries contrary to law. The number so reported approximates 150.

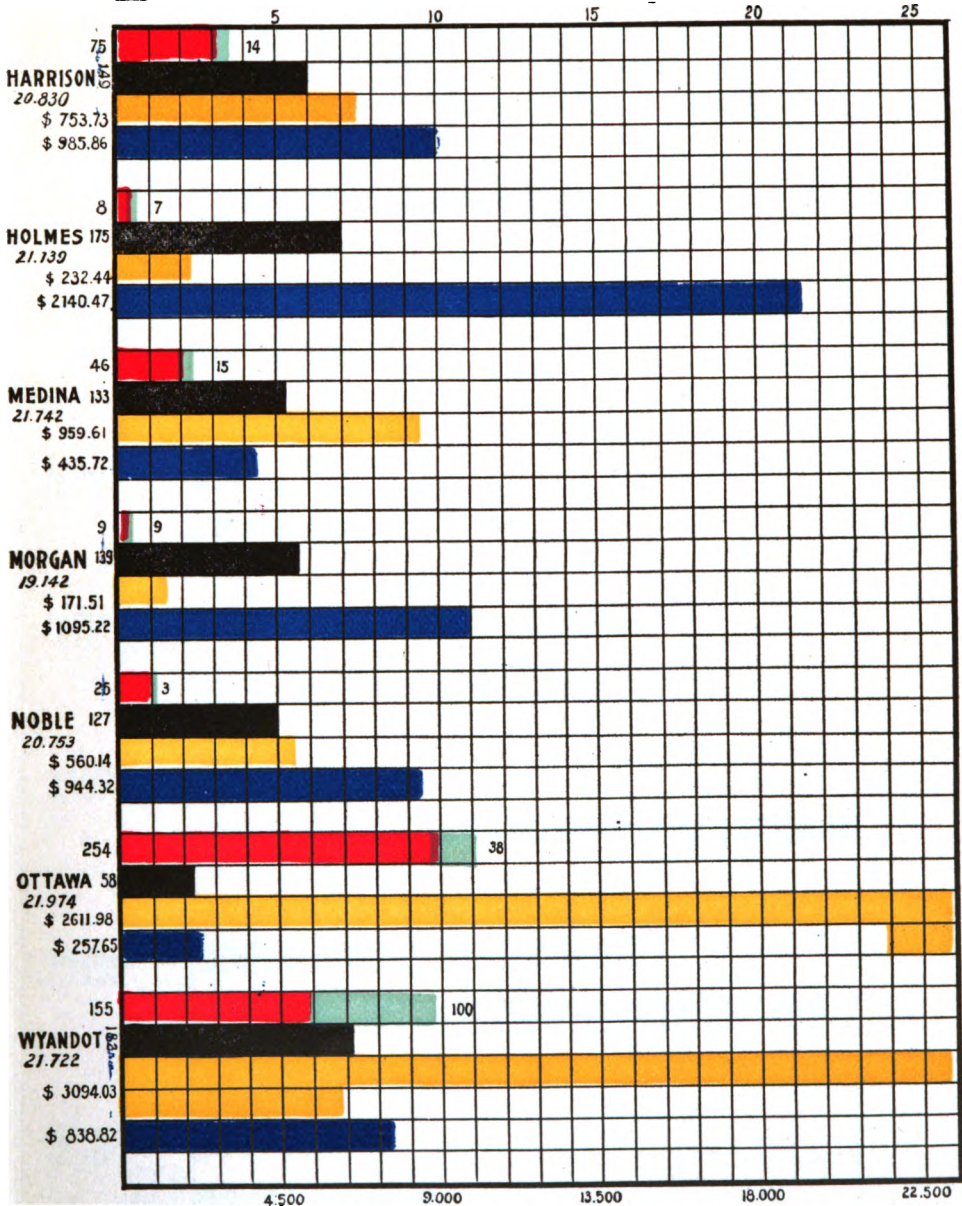

The number of insane remaining, including the four counties making no report, and using for these four the statistics of 1899, is 1,267; the number of epileptics on the same basis is 304, and of idiots, 687. In 1895 the number of insane in the infirmaries was 1,422; epileptics, 433; and idiots, 699. The decrease during the last five years in these three classes is as follows: Insane, 155; epileptics, 189; idiots, 12.

The total current expenses of the infirmaries for the year, estimating five counties, was \$930,899.77. To this should be added \$64,056.19, paid for per diem and expenses of directors.

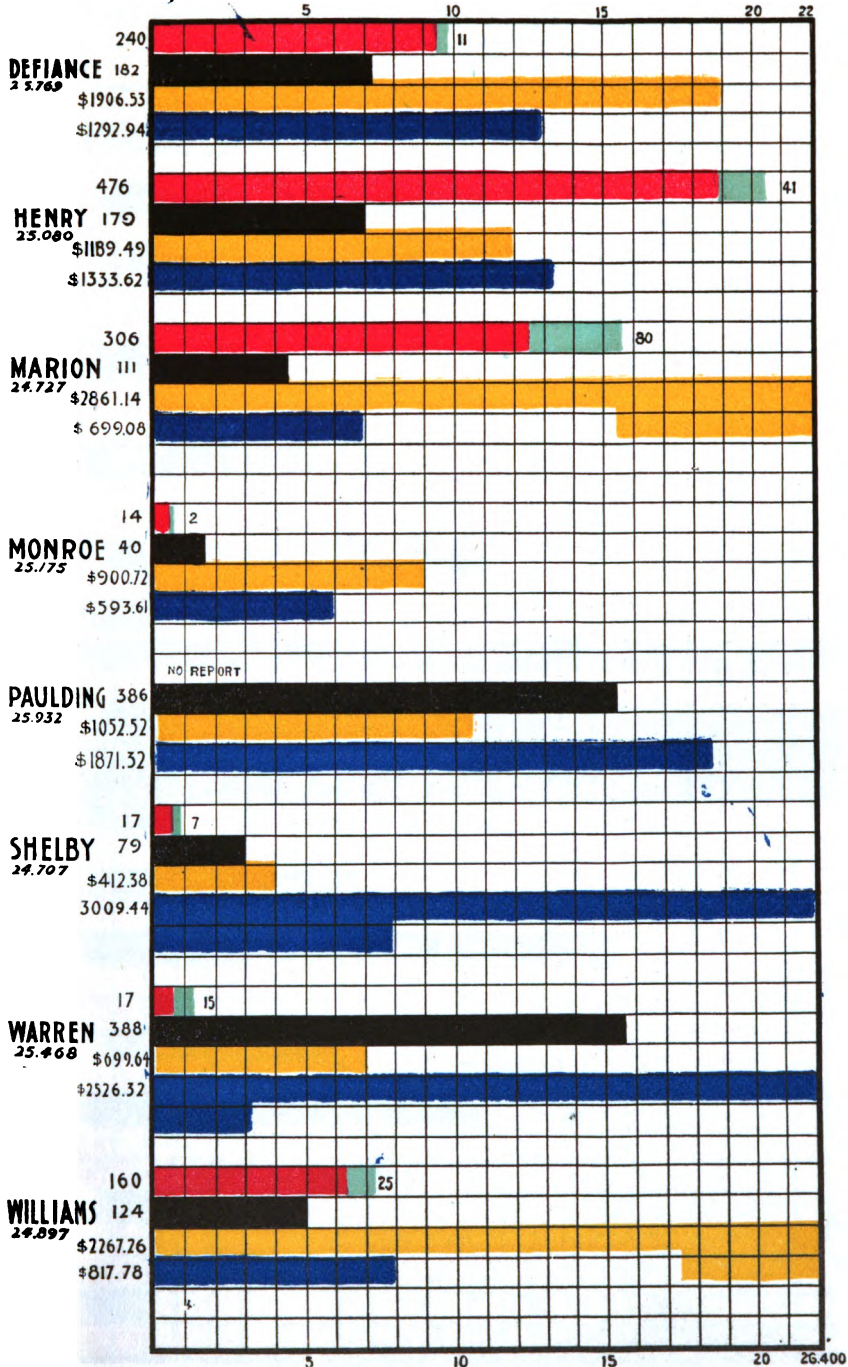

The average per capita cost was \$72.53, the three highest being reported from Ross County, \$173.91; Hamilton County, \$143.71, and Co-

lumbiana County, \$136.60. The lowest from Noble County, \$13.16; Fayette, \$27.12; Henry County, \$27.50. In explanation of the apparent low per capita cost it may be stated that a number of the infirmaries with relatively small populations have large and profitable farms. The amount received from the sale of farm produce and stock, not counting that consumed by the infirmary inmates, was \$53,371.63.

CHILDREN'S HOMES.

Thirty-two Homes (eighteen not reporting) report a total number of children cared for since their respective organization, of 18,806 — 10,726 boys and 8,080 girls.

The statistics for the year 1900 are complete with the exception of the following named counties: Knox, Logan, Meigs, Monroe, Union, Warren and Wayne. At the beginning of last year 2,144 children were in the Homes. During the year 1,366 were admitted, making a total cared for, of 3,510. Of these, 644 were placed, 735 returned to parents or guardians, 73 transferred to other institutions, 23 ran away, 20 died; and at the close of the year 196 were out on trial. The number remaining September 1, 1900, was 2,031, a decrease in population during the year of 113.

The total current expenses, including salaries, were \$220,798.07. The per capita costs vary greatly. Defiance County, \$58.16; Hocking County, \$62.14; Preble County, \$65.00; Lawrence County, \$65.67; Harrison County, \$65.81; Trumbull County, \$154.30; Warren County, \$152.18; Licking County, \$138.43; Belmont County, \$138.00.

There are fifty county children's homes in the state. In addition to these there are nine Homes semi-public in character, that is, Homes under private management, but to which children are or may be sent by the county officials, and for whose maintenance in the Homes the county pays a certain per capita.

When we contrast the experience of our own State with that of Michigan, Indiana, Minnesota, and of some of the eastern states the wisdom of adding to the number of institutions for children will be doubted. In the last twenty years Ohio has transferred her dependent children from county infirmaries to children's homes. In many instances the original intention of our Homes has, in a large measure, been lost sight of. The general character of the children is such as to warrant the belief that with proper machinery for placing, a majority of these children could be placed in family homes. That is not being done, either to the best advantage or to the fullest extent possible. Many of our Homes, instead of providing temporary care for children, are apparently operating on the "institution" idea. This is shown by the long average stay of children in these Homes. With possibly some exceptions the efforts now being made to find family homes, to place children therein, and to supervise them after placement, are inadequate and inefficient.

In Indiana the direct supervision of this work by the State through the appointment of a state agent, has resulted in a marked decrease in the number of children under public care, and the consequent reduction in the cost of public maintenance. Indiana followed the example of Ohio in the establishment of county homes. The difficulties encountered here were experienced with equal force in our neighboring state. In Indiana, as in Ohio, the tendency to increase institution provision for children and the consequent steady increase in the number cared for were noted; but in Indiana and *not in Ohio* steps have been taken to counteract this tendency, and after a trial of about four years Indiana's experiment has proven in many particulars worthy of imitation in our own state. The duty of the Board of State Charities is performed when it brings this matter to the attention of the legislature, with whatever suggestions or recommendations it may have to offer.

All of which is respectfully submitted,

GEO. K. NASH,

Governor and President ex officio.

R. BRINKERHOFF,

MARTIN DEWEY FOLLETT,

WM. HOWARD NEFF,

HENRY C. RANNEY,

W. A. HALE,

Members of the Board.

* Estimated.

APPENDIX.

(An explanation of the colored charts found in this report.)

The population of each county is given under the name of the county. Each chart takes up counties of approximately the same population, census of 1890.

Chart No. 1.—Holmes, Morgan and Noble are nicely proportioned. The ratio of county cases to township cases is good in the first two counties. Ottawa and Wyandot counties are very badly proportioned; in each instance the red and green colors predominate very largely over the black. This indicates an indifference on the part of the county officials in the administration of the new poor laws. There is no good reason why Wyandot and Ottawa counties should so largely exceed the showing of the other counties. Another noticeable thing is the difference in the per capita relief. For instance, the township relief in Holmes county (black) covers seven squares—175 people; the amount expended in their relief covers nearly twenty-two squares—\$2,140.47; while in Wyandot county, with but a fraction over seven squares of black color, the expenditures (blue) cover but eight and a half squares; in other words, the expenditures in Holmes county were more than two and a half times those of Wyandot in caring for about the same number of people.

Chart No. 2.—This chart makes a bad showing for Defiance, Henry, Warren and Williams counties. Defiance, Henry and Williams counties are in the extreme northwestern part of the state. They are contiguous counties. Shelby is in the middle west. There is nothing in the climate, soil, industries or character of the people to satisfactorily explain the great difference existing between Shelby and these three other counties.

Chart No. 3.—Note especially Huron county. The habit of relief would seem to be thoroughly ingrained into that county. Brown and Perry counties are well proportioned. Crawford and Sandusky are very bad. Indeed, the *proportion* in Huron county is not so bad; it is the *quantity* and not the proportion that is striking in this instance.

Chart No. 4.—They are all bad; Jefferson and Miami for their inability to report on the number of persons relieved.

Chart No. 5.—This is one of the most striking in the set. The best proportioned counties are Belmont and Muskingum. Summit is bad; Mahoning is terrific.
